SUMMARY

I am a Fullstack Developer with 1+ year of experience developing web applications, backend services, and workflow automation solutions for international clients. Proficient in .NET, ASP.NET Core, Node.js, NestJS, ReactJS, SQL Server, PostgreSQL, and cloud deployment. Experienced in RESTful APIs, authentication systems, database design, blockchain integrations, and scalable application architecture.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java | **Backend:** ASP.NET Core, .NET, Node.js, NestJS, Express, GraphQL, REST API | **Frontend:** ReactJS, NextJS, VueJS, TailwindCSS | **Database:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis | **Tools:** Docker, Git, GitHub, GitLab, Jira, Swagger, Jest

EXPERIENCE

Freelance Fullstack Developer – Wordbee (04/2026 – 06/2026)

Developed and maintained fullstack applications using ASP.NET Core, ReactJS, and SQL Server for translation workflow management systems. Designed RESTful APIs, business logic, and frontend integrations to streamline content processing and project management workflows. Built integrations with Google Sheets, Unity, and Unreal Engine, enabling automated data synchronization and improving operational efficiency for international clients.

Freelance Blockchain Backend Engineer – Solana Swap Project (01/2025 – 03/2025)

Built a high-performance token swap service on the Solana blockchain using Solana Web3.js and Raydium SDK v2. Implemented support for AMM, CPMM, and CLMM liquidity pools while handling transaction signing, wallet management, and on-chain confirmation tracking. Improved transaction throughput and reliability through RPC optimization, queue-based processing, and concurrent multi-wallet trading workflows.

Fullstack Developer – AIOT Company (06/2025 – 12/2025)

Contributed to multiple enterprise web applications using NestJS, ReactJS, NextJS, MySQL, and Redis. Developed core modules for the Attendance Management System including authentication, Role-Based Access Control (RBAC), leave management, and administrative dashboards. Collaborated in Agile/Scrum teams, participated in code reviews, CI/CD processes, and optimized application performance through scalable API and database design.

Fullstack Developer Intern – SBAY Company (02/2025 – 05/2025)

Participated in the development of an online flight booking platform using ReactJS and Node.js. Integrated airline APIs to retrieve flight schedules, pricing information, and booking data while implementing backend business logic and RESTful services. Collaborated with the development team to test, troubleshoot, and optimize booking workflows, improving system stability and user experience.

EDUCATION

Duy Tan University – Software Engineering
GPA: 3.43/4.0

CERTIFICATION

TOEIC 700
